bluesign® system partners are responsibly acting parties of the textile value chain committed to applying the bluesign® system. They aim to continuously improve their environmental performance and are focused on a sustainable future.

bluesign® system partners are committed to applying the bluesign® system which unites the entire textile supply chain to jointly reduce its impact on people and the environment. The Input Stream Management ensures that bluesign® approved chemical products and raw materials are used in all steps of the manufacturing process. Substances posing risks to people and the environment are hence eliminated from the very beginning. On-site inspections verify the proper application of such chemical products and raw materials in controlled processes and ensure the responsible use of resources.
