**The Gospel According to Spiritism** - A book ahead of its time, The Gospel according to Spiritism has set a high standard in restoring the original power and significance of Jesus Christ's unique message to the world. Using his extensive knowledge on the subject, Allan Kardec presents the ancient scriptures with effortless authority, as he explains step by step the many concepts, words and expressions found in the Gospel that have become obscure and difficult to understand after centuries and millennia of successive copies and translations....

**Genesis** - This book is so rich and varied in its contents that highlighting its topics is almost impossible. For instance, by “Genesis,” Kardec does not mean exclusively Moses' famous book, but also various ancient texts dealing with the creation of the world and a cataclysmic demise of the human race. Furthermore, both in Miracles and Predictions, we are presented with facts and phenomena which have come a long way from the realm of superstitions and legends, to reveal themselves as perfectly explainable within the laws of Nature.

**Spiritist Journey in 1862** - When Allan Kardec set out for his historical journey of 1862, not even he could have foreseen the immense growth of Spiritism in France, inaugurated with the publication of *The Spirits' Book* in Paris only five years earlier. In a time when there was no radio, nor any other means of mass communication other than the printed word, that span was remarkable by any standards. Offering some rare glimpses into the Codifier's way of thinking, this book covers some practical aspects of nascent Spiritism, while keenly narrating its quiet triumph against formidable odds and opposition.

**Spiritist Prayers** – Those who enthusiastically and confidently pray have more strength to withstand the temptations of evil, and to get help from the good spirits sent by God to assist them in so doing. Such help is never refused when honestly asked for. The form is nothing, the thought is everything. Everyone should pray according to their convictions and the manner that affects them most deeply; a good thought is better than many words with nothing from the heart within.

# USSF - Books by Leon Denis

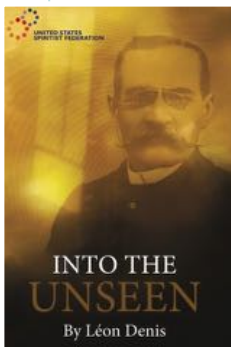

**After Death** – After Death is one of the most important books of classic Spiritist literature. In his poetic prose, a style that we find in his other books, Léon Denis presents a scientific and rational solution regarding the problems of life and death, and of the nature and destiny of the human ego in its successive lives. This book is an able and luminous account of the phenomena and doctrines included under the term “Spiritualism,” their relation to modern science and their influence on conduct. It is therefore not surprising that After Death has been translated into several languages and that it continues to elate people all over the world.

Author: Leon Denis

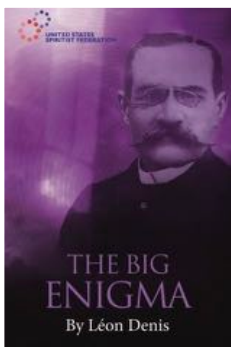

**The Problem of Life and Destiny** – Considered by many to be his greatest book focusing on Reincarnation, Successive Lives and Regression of Memory, among other equally intriguing subjects in the field, The Problem of Life & Destiny is almost encyclopedic in its scope, providing hundreds of examples and experiments from all over the world. Every topic is dealt at great length bearing in mind scientific standards of validity and reliability. For many, this book represents the author’s thought at its zenith, the fruit of half a century’s experience and study of psychical phenomena and mediumship.

Author: Leon Denis

**Into the Unseen** – For the first time in English, this legendary book tells it all about the spirit world and its manifestations. From Europe to the UK, and all over the US, not forgetting places as unusual as Brazil, and from the distant past of humanity, INTO THE UNSEEN does justice to them all, while revealing Léon Denis’s very personal take on Spiritism and New Spiritualism in general. A fascinating narrative backed by a plethora of extraordinary cases thoroughly researched by the author.

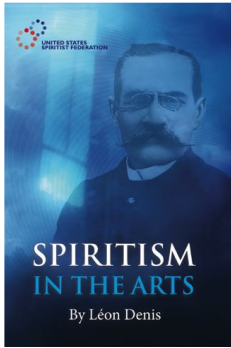

Author: Leon Denis

**The Big Enigma** – Perhaps the most intimate and metaphysical of Léon Denis’s many books, THE BIG ENIGMA often reaches the sublime in unforgettable passages that do not seem to come from this world. Deeply moving and quite formidable thoughts succeed one another in endless continuity, leaving the reader in awe before the author’s complete certainty and conviction. There is a ring of sterling truth in all these philosophical and spiritual teachings from a brilliant thinker who has matured over the years during his long and difficult life.

**Living is the Best Choice** – There are moments when life becomes a burden and many of us lose the courage of moving on. This experience is more common than one can imagine. However, people often do not like to talk about it or do not have anyone to share their difficult moments with. The more one feels melancholy or depression, the greater the risk for isolation or guilt in one's life. There are many paths that lead to suicide. Tragically, society often ignores the seriousness of these situations and the urgency of some measures that could potentially mitigate this problem, considered a public health issue worldwide.

Author: Andre Trigueiro

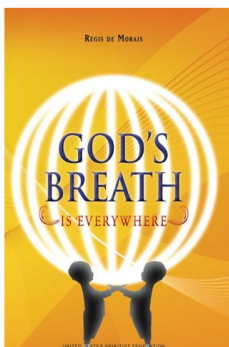

**A Practical Guide for Magnetic and Spiritual Healing** – The power of healing through one's gaze, touch, and the laying on of hands is one of the forms by which spiritual action is exerted over the world. Some individuals, by prayer and magnetic élan, attract this influx to themselves, this radiance of the divine force which drives off the impure fluids that cause so much suffering. The spirit of charity, of devotion verging on sacrifice, of forgetfulness of self, is the condition necessary to acquire and preserve this power, one of the most wonderful ones bestowed by God on humans.

Author: Jussara Korngold

**Mediumship All You Need to Know** – The author of this book shares his rich and fulfilling lifelong experience with mediumistic phenomena. The knowledge in this book empowers mediums to embrace their calling, use it appropriately, safely and live healthier and more meaningful lives.

**God's Breath is Everywhere** – From Krishna to Buddha, Moses to Jesus, Augustine to Francis of Assisi, or Allan Kardec to Albert Einstein with his revolutionary  $E = m \times c^2$ , and then even recently, in these dismal times we live in, the wind of God has blown when and where It wishes: sometimes with fearsome strength; at times so subtle it can go unnoticed by those who spend life like jaded spectators. Erudite but vibrant, for forty years at the service of Spiritism, the author offers a wealth of information in this precious book, a gesture of goodwill toward the worldwide reader.

**After Life** - Planet Earth is a world of expiations, a place for educational journeys, and as such, it is a reflection, albeit incomplete, of the Spirit World. **The Spirits' Book** is the initial landmark publication of the five basic works that make up the Codification of Spiritism that has made a profound impact on the thought and view of life of a considerable portion of humankind since the first French edition was published in 1857. It is structured in four parts and has 1,019 questions asked by Allan Kardec, the Codifier of Spiritism. It rationally and logically presents the teachings of Spiritism in their scientific, philosophical and religious aspects. No matter what the religion or beliefs of the reader are, the reading of this book will be of immense value for everyone.

Author: Allan Kardec - Translator: Darrel W. Kimble / Marcia M. Saiz

**The Mediums' Book** - Allan Kardec was the first to seriously study mediumship by using the scientific method. This book presents the teachings of spirits on all types of spirit manifestations, the ways of communicating with the invisible world, the different types of mediums and the development of mediumship. Employing scientific strictness, it analyses hoaxes and charlatanism, and proposes methods of verifying and controlling information given by spirits.

Author: Allan Kardec

**The Gospel According to Spiritism** consecrates the union between science and religion by explaining the moral maxims of Christ, their accordance with Spiritism and their application to various circumstances of life. This book contains the essence of the moral teaching of Jesus. Thus, it attracts followers of all religions -- and even those who don't have a religion -- because it offers a safe process for our inner change. In order to reach these goals, our immortal spirits must fully comply with the divine laws in our gradual evolutionary journey towards God.

Author: Allan Kardec

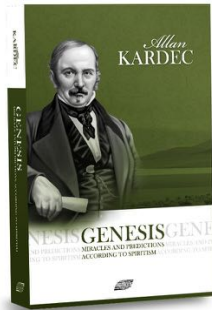

Translator: Janet Duncan

**Heaven and Hell** In this book, Allan Kardec approaches divine justice from the point of view of Spiritism. The first part is a comparative analysis of the concepts of different faiths about heaven, purgatory and hell, angels and demons, and future punishments and rewards. The second part presents numerous communications with spirits in different situations, and which shed light on the state of the soul after death and its passage from the physical life to the spirit life, which until then had been obscure and feared.

**Genesis** This is the most scientific book by Allan Kardec. It deals with themes regarded as incontestable by religion in the light of the immortality of the soul, unifying Christian thought and scientific discoveries. It offers us a unique opportunity to know and study themes of universal interest, discussed in a logical, rational and revealing manner. It coherently analyzes the origin of planet earth and avoids mysterious or magical interpretations about its creation. It also analyzes the question of miracles, explaining the true nature of the extraordinary phenomena of the Gospels.

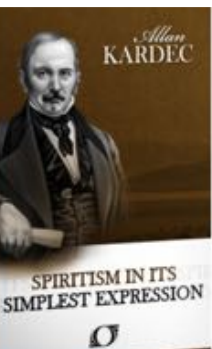

Author: Allan Kardec - Translator: Darrel W. Kimble / Marcia M. Saiz

**What is Spiritism?** The book is divided into three chapters. The first is composed of dialogues between Kardec and a critic, a skeptic and a priest, providing answers to those who do not understand the basic principles of Spiritism. The second chapter presents practical and experimental aspects of the science and is a kind of summary of The Mediums' Book. The third chapter is a short synthesis of The Spirits' Book, with solutions to psychological, moral and philosophical problems according to the Spiritist Doctrine.

Author: Allan Kardec

Translator: Darrel W. Kimble / Marcia M. Saiz/ Ily Reis

**Spiritism in its Simplest Expression** - Wanting to popularize Spiritism and make spreading it easier and quicker, but without prejudicing the basic works of the Spiritist Doctrine, Allan Kardec wrote a number of booklets and distributed them throughout France at prices that were affordable for anyone who might be interested. Some of them had several printings and were highly successful. They continued to be republished even after the Codifier's discarnation. This is one of those booklets. It is hoped that Spiritist readers will find that this unpretentious work enriches their knowledge of the Spiritist Doctrine.

**Our Children Are Spirits** - is This book proposes a challenge. It questions the traditional thinking about how children come to be. Most of us take for granted that our babies are entirely created by ourselves, mom and dad. Yet parents only offer the baby genetic conditions to construct physical bodies they need to live for however long, in this world of ours. Further, it is widely believed that each baby comes with a brand new soul or spirit created for that specific body. That is not the case however. Each and every baby comes with a PAST. **Spiritism for children (eBook):** This book was originally released in 1918 and it is certainly the first attempt to write a Spiritist book addressed directly to children, although it can also be used by parents to educate their children, a task that should not and cannot be neglected by those who call themselves Spiritists. Once, Emmanuel was asked: "What is the best school to prepare the reincarnated souls on Earth?" Emmanuel replied, "The best school is still the home where one learns the main facts about consciousness and character."

**Spiritist Stories (eBook):** The episodes in this book are fictional, but they all represent what we see in real life. We sometimes are forced to witness these episodes, but many a times we experience them ourselves. The "stories" allow us to point out the strict consequences of the Divine Justice, from which no one can escape. Referring to them, Nubor Facure says: "Between the lines, in these episodes, Spiritist concepts were included and there are a thousand of opportunities to learn what life gives us".

**NEUROPILLS, readings on the brain and the gospel (eBook):** This work presents teachings and several reports that show us that the greatness of God is invaluable and unique. As is known, our behavior is what leads our steps to smooth paths or to dry and rough land. The Universal law - whose mechanism pertaining to the so-called law of action and reaction works in a natural way - will always apply to everyone. And something so wonderful is to know that suffering can be reduced; it is enough that understanding is exercised through study, example, experience and will.
