

Barkeep Pour Cost Report – Troubleshooting

How do I set-up Red Bull when I use it in cocktails?

Unlike other mixers and soda, **Red Bull** is a product that many bars track in their inventories. If you count **Red Bull** in your Barkeep Inventories, you should also include it in Sales Item Recipes.

When you track **Red Bull** as an Item in Barkeep, you will need to assign it to a Category.

The Item Details screen as well as the Items list both show **Red Bull** in a Category called **Red Bull** that is part of the Nested Category **Energy Drinks** with a Parent Category of **Non-Alcoholic/Mixers**.

Reminder: Barkeep allows you to customize Categories to suit your needs.

The screenshot shows the 'Item Details' screen for 'Red Bull'. The fields are as follows:

An Example Sales Item

When **Red Bull** is included in a cocktail, the quantity used is typically one-third of a can. In the example below we show a Sales Item called **Vodka Red Bull**. The Sales Item's Recipe specifies a quantity of .33 Cans of **Red Bull** and 2 ounces of **Smirnoff Vodka**. BarkeepOnline allows you to use different Units of Measure in the same Recipe (i.e., **Oz** and **Cans**). The important step is that you enter the correct quantity(s) for any Recipe.

The screenshot shows the 'Sales Item' form for 'Vodka Red Bull'. The fields are as follows:

- Sales Item Name: Vodka Red Bull
- Sales Item Number: 704
- Modifier: (empty)
- Description: (empty)
- Average Sales Price: \$7.85
- Cost: \$1.23
- Pour Cost: 15.71%
- Inactive?: ☐
- Exclude?: ☐
- Recipe: Add Recipe Item +

Below the form, there is a 'Search:' field and a table with the following data:

Sales Item	Category	Item	Quantity	Quantity Type	Sales Percent
Vodka Red Bull	Red Bull	Red Bull	0.33	Can	44.44%
Vodka Red Bull	Well Liquor	Smirnoff Vodka	2	Oz	55.56%
