

GET A BOOSTER!

- ♥ COVID-19 booster shots of the Pfizer, Moderna, and J&J vaccine have been shown to provide added protection against COVID-19 and its variants.
- ♥ Immunity wanes over time for many different vaccinations.
- ♥ Those who got a Pfizer or Moderna vaccine can get a booster shot after their second dose. Those who got a J&J vaccine can get a booster shot after their single dose.
- ♥ Adults can choose any brand of booster they prefer or have access to, regardless of which brand they received for their initial vaccination.
- ♥ For more information or to find a booster near you, check out these sites from the CDC and MDH:
